PROFESSIONAL EXPERIENCE

LinkW Technology Logistics

Fontana, California

Product Manager

Jul. 2025 – Present

- Partnered with business stakeholders to translate operational pain points into product features for WMS enhancements
- Led development of an automated storage assignment workflow that optimized destination-based consolidation and operational rule enforcement, increasing warehouse location utilization and improving inventory accuracy by 30%
- Defined product and integration strategy for internal WMS and third-party YMS systems, aligning API architecture, operational workflows, and data flows to improve warehouse-to-yard coordination
- Led data governance and workflow digitization initiatives, standardizing operational metrics and launching BI dashboards that improved reporting accuracy, traceability, and data-driven decision-making for operations stakeholders
- Built an LLM-powered AI analytics agent that converts natural language queries into automated dashboards, enabling self-serve reporting for non-technical stakeholders
- Rapidly prototyped AI-assisted frontend experiences to validate product workflows, accelerate stakeholder feedback

UnieUnie

Ithaca, New York (Remote)

Product Manager (Part Time)

Mar. 2025 – Jul. 2025

- Defined product roadmap from 0→MVP for a two-sided student platform, designing identity verification, matching logic, and in-app Messaging, enabling verified students to coordinate travel and build connections
- Conducted user research to identify top pain points, informing MVP prioritization and feature roadmap decisions
- Led competitive analysis across social event platforms, defining unique value proposition and positioning strategy
- Organized beta testing with 100+ users, analyzed feedback, and prioritized 20+ improvements to enhance trust, engagement, and responsible usage

Chubb

Ithaca, New York (Remote)

Student Data Analyst

Sep. 2024 – Dec. 2024

- Developed fraud-detection analytics leveraging NLP, RAG, and LLM techniques, building a multilingual sentiment analysis model (77.49% accuracy) to detect fraud signals in insurance claim responses
- Performed end-to-end data preprocessing (normalization, tokenization, translation) to improve model reliability
- Developed reporting solutions to present KPI metrics, recommendations, risks, and mitigations to stakeholders at Chubb

ByteDance (Parent Company of TikTok)

Beijing, China

Product Manager Intern

Jun. 2024 – Aug. 2024

- Enhanced Matrix Manager SaaS product supporting hierarchical governance between HQ and store operators, designing role-based access and workflow controls to align distributed marketing teams and manage their marketing efforts on TikTok
- Designed an LLM-powered video generation workflow, performing prompt engineering and output evaluation to improve content quality and increase average video views by 15%
- Assisted in designing an AI assistant on TikTok Shop for live stream, projected to gain 10,000+ new user views per month
- Collaborated with enterprise clients (e.g., Lenovo) to translate business needs into scalable product solutions

ByteDance (Parent Company of TikTok)

Hangzhou, China

Product Manager Intern

Jul. 2022 – Dec. 2022

- Improved the Argos cloud microservice monitoring platform through collaboration with global cross functional teams (US, Singapore, and China) using Agile management
- Analyzed feedback from 3,140 users and 55 interviews to redesign roadmap, reducing 20%+ support tickets
- Reduced the operation cost by eliminating redundant alert rules, achieving over 40% reduction in duplicate alerts

EDUCATION

Cornell University

Ithaca, New York

Master of Engineering Management | GPA: 3.99/4.30

Aug. 2023 – Dec. 2024

Courses: Project Management, Data Analytics, Customer Analytics, Digital Marketing, Finance, Decision Framing and Analytics

Zhejiang University

Hangzhou, China

Bachelor of Engineering in Computer Science and Technology | GPA: 3.67/4.0

Sep. 2019 – Jun. 2023

Awards: Third Prize Scholarship, Provincial Gold Award at 'Internet+' Innovation and Entrepreneurship Competition

SKILLS AND LEADERSHIP EXPERIENCE

Technical Skills: Vibe Coding (Cursor), Figma (AI make), Python, C, C++, Java, SQL, R, Axure, SPSS, Git, Excel, Data Analytics, Generative AI, RAG, Prompt Engineering, Knowledge Base, Cloud Service

Professional Skills: User Research, A/B Testing, Competitor Analysis, Digital Marketing, Agile/Scrum (JIRA, Confluence)

Leadership: Led Chu Kochen College Debate Team at Zhejiang University to win the championship (1st out of 32 teams)

Interests: Debate (Best Debater in Debate Competition for four times), Table Tennis, Science Fiction, Hiking
